

# MAINTENANCE CAPABILITY LIST

Date:23-out-2023

## 1. Introduction

### 1. 1. General

TAP-ME's Maintenance Capability List is an extension to TAP-ME's EASA Part 145 approval certificate and details the components for which TAP-ME is allowed to issue an approval for return to service, also known as components for which TAP-ME has capability for intervention.

For each component, the approved maintenance intervention level is described as follows:

- \* Inspection
- \* Test
- \* Repair
- \* Overhaul

Components specified in this list are complete assemblies, however, the individual piece parts and sub-assemblies are also considered to be covered by the entry in the list of the complete assembly.

### 1. 2. Columns Description

1. PART NUMBER – component's part number
2. DESIGNATION – component's name
3. ATA Spec – component's chapter in accordance with ATA Specification 2200 system
4. RATING – EASA's classification
5. MANUFACTURER NAME
6. INTERVENTION LEVEL
7. CMM REFERENCE

### 1. 3. Correlation between ratings and ATA Spec chapters
